St. Cyprian's Church Annual Meeting

The annual meetings of St. Cyprian's Church and the W.A. were held at the home of Mr. and Mrs. Pitt on Monday evening. Rev. A. D. Currie occupied the chair.

The financial report of the church was read by Mr. J. D. Thomas and was duly adopted.

Mr. Currie asked the present officers to carry on for six months, as there would likely be a change in ministers during that time. He appointed Mr. H. D. Booker as Rector's Warden and Mr. J. D. Thomas was unanimously elected People's Warden.

Mr. H. D. Booker was appointed delegate to the meeting of the Synod to be held in Calgary in February, with Mr. W. Pitt as alternate.

The present sidesmen were all re-elected.

Mrs. Lowrie read the financial report of the W.A., which showed a very successful year and indicated that a large percentage of the church fund had been raised by the ladies of the Auxiliary.

Mrs. E. K. Pratt was re-elected president and Mrs. Lowrie secretary-treasurer.

Votes of thanks were accorded Mrs. Booker for conducting the Sunday School; Mr. Lowrie, the auditor; and to the wardens.

WEDDINGS

POGMORE—MOYLE

A quiet wedding was solemnized at the home of the bride's father, in the presence of relatives and a few intimate friends of the bride and groom, at 2:30 p.m. Saturday, January 11, 1936, when Helen Elizabeth, second daughter of Mr. F. T. Moyle and the late Mrs. Moyle, of Didsbury, became the bride of Mr. James E. Pogmore, of Byemoor, Alberta. Rev. J. R. Geeson officiated.

Mountain View Council Meeting

The regular meeting of the council of Mountain View Municipality was held at Olds on Saturday, with Deputy-Reeve J. A. Dodd in the chair.

A resolution was submitted by the Municipality of Grawold opposing the cancellation of the rebate to farmers of the tax on gasoline. The council approved the resolution.

Plans of the grade at the Rupp Hill, southeast of Didsbury, were submitted and the survey was approved.

A communication was read from the government stating that in view of the number of appeals received from taxpayers throughout the province, who through crop conditions, claim to be unable to pay the installment of consolidated and current taxes due under the 1933-34 agreement, it is proposed to introduce at the next session of the Legislature legislation to give relief in these cases. The municipal councils are asked not to take any action to cancel agreements until legislation has been brought down.

Three applications for relief were dealt with and an application for old age pension was approved.

McCloy's Rink Wins at Crossfield

The McCloy rink was successful in getting into the jewelry in both major events at the Crossfield Bonspiel last week. They took first prize in the Grand Challenge and got third place in the Citizen's Event.

The personnel of the rink was: McCloy, skip; Frank Kaufman, Dave Edwards, Howard Halliday. Heselton's rink, the other Didsbury entry, failed to get into the prize money in any event.

Frank Heselton, Jack Wordie, J. Canthness and Jack Topley were the personnel of the rink.

Special Didsbury Broadcast

Here is a date for Didsbury and District to remember—Friday, January 24th—tune to Calgary Station C.J.C.J. and listen to the special Didsbury program. One complete hour commencing at 11:45 noon. Your home town will entertain you. Remember the date and listen to 690 on your radio dial.

Calgary Albertan Becomes Social Credit Organ

Negotiations have been completed for the purchase of The Calgary Albertan, the only morning paper in the province of Alberta, with which will be merged the Social Credit Chronicle.

The paper will continue to be published as a morning newspaper and will enjoy the confidence of the Government as well as being the official organ of the Alberta Social Credit party. The present management will continue.

Arrangements also include the purchase of Radio Station CJ.CJ., the broadcasting station of the Alberta Publishing Company Limited.

For the first time in the history of Canadian journalism the ownership of a daily newspaper will be offered to the public through the sale of preferred and common stock.

When shown this announcement, Mr. Aberhart made the following statement:

"I am very glad indeed to hear this and I trust that all Social Creditors will avail themselves of the opportunity to establish an organ that will give them the news of the day from the citizen's viewpoint."

"This action will help Social Creditors implement the requirements of Major Douglas in his Interim Report regarding the radio station and the press."—Calgary Albertan.

Hockey Game On Saturday Night

Calgary Spartans will play Didsbury Canadiens on Saturday evening at 9:15 p.m.

Calgary Spartans are a fast-skating team with lots of combination and will be sure to give the Canadiens a real game.

Spartans are managed by Charlie Grant and coached Bill Goodrich.

Didsbury U.F.A. Elects Officers

The annual meeting of the Didsbury Local U.F.A. was held at the home of Mr. N. S. Clarke on Friday last.

Mr. McCool spoke on "Alberta Finance at the time the U.F.A. Government stepped out of office" and cleared up many points which he claimed had been misrepresented.

The sense of the meeting was to keep the U.F.A. organization in good running order so that in future they may be prepared to take their part in public affairs.

The officers for the ensuing year were elected, Roy McNaughton was re-elected president, James Hosegood vice-president, W. J. Scheidt secretary. The directors elected were, N. S. Clarke, W. J. McCoy, Chas Dickau, Frank Jackson, J. B. Worthington, Hugh McLean, Theo Reist and E. St. Claire.

The delegates chosen for the convention were Roy McNaughton and N. S. Clarke.

The dance given by the hospital last Friday was very successful and net a profit of about \$45.00 for the Hospital funds.

Five Didsbury Rinks Go To Carstairs

Didsbury rink was very well represented at the Carstairs bonspiel which was held this week, five rinks entering the competition. The rinks taking part are:

Edwards, skip; Wallace, Topley, Goertz.

H. C. Liesemer; W. Wyman, W. Ross, Len Berscht.

Julien; Fleury, Sanderman and Ed Ford.

Pitt; Sinclair, McFarquhar and Heselton.

Fisher; Johnson, Dr. Clarke and Adshead.

WEEKLY JOKE

The wife of a small farmer sold her surplus butter to a grocer in a nearby town. On one occasion the grocer said, "Your butter was under-weight last week."

"Now fancy that," said Mrs. Farmer, "Baby mislaid my weight, so I used the pound of sugar you sold me."

Tractor School.

Henry Goehring is putting on a Tractor School on Monday and Tuesday, January 20 and 21. Lectures will be given on all models of tractors, including the new Diesel.

There will be a display of tractors, cut-away motors and Diesel motors. The lectures will be illustrated by talking pictures.

These schools are a splendid thing for the owners of tractors of any make. Much valuable information is given and one can often learn something that will mean a considerable saving in the operation of the tractor.

Will Hold Bonspiel

The Didsbury Bonspiel will open on Monday, January 27th, and will probably carry on for three days. There will be two major events and consolation.

It is expected there will be visiting rinks from Crossfield, Carstairs, Olds and Innisfail.

The Canadian Wheat Problem

In a recent article a suggestion was made that the time is ripe to make efforts to induce the consumer in Great Britain, and particularly in England, to demand a better quality of bread, in anticipation that the creation of an appetite for quality loaf would naturally result in greater sales of Western Canadian hard spring wheat in Canada's best, though restricting market.

The suggestion was based on evidence that this market is narrowing due to a growing taste for more expensive and exotic substitutes for the staff of life throughout Great Britain generally, fortified in England particularly, by an appetite for bread of a lower protein content than is contained in flour manufactured from the hard spring wheat for which the Western prairies is the natural habitat.

Since that time further and more potent evidence has come to hand, which not only confirm the statements aforesaid a disquieting trend in the Old Land which, unless stemmed, is bound to adversely affect the interests and welfare of the Western Canadian prairies but, if anything, tends to show that the situation is even more alarming than it might have appeared at first blush. In view of the great importance of this market, the life blood in fact, of Western Canada, no apology is needed for again reverting to the subject in such short time.

The confirmation of this highly undesirable (from the viewpoint of Western Canadian citizens, rural and urban alike) condition existing in Great Britain and other European consumer countries, comes from Sir Francis Floud, British high commissioner to Canada, who, about the middle of December, sounded a warning note to the general effect that Canada is in serious danger of losing the British and European markets. He gave three principal reasons for his dire assertion and they are as follows:

1. The spread in price between Canadian and Argentine wheat.
2. The growing demand in Great Britain for fancy breads which are composed of 90 per cent. Argentine soft wheat and 10 per cent. Canadian hard wheat.
3. The falling population of the civilized countries of the world.

In his comments before the Commerce Club of the University of Toronto, Sir Francis Floud drew a dark picture of the outlook, in which he pointed out that in recent years the proportion of Canadian wheat taken by Great Britain has been dwindling steadily while the price spread between Argentine and Canadian wheat has been widening, to the detriment of the latter in a country which is noted for the policy of its industrial and commercial interests of buying in the cheapest markets.

"I am sorry to say this, gentlemen," Sir Francis is quoted as saying, "but the outlook for Canada as an agrarian nation is both bleak and difficult, and until economists solve the present baffling international trade problems the future for Canadian wheat is a very serious problem."

Practically on the same date news despatches announced at least a temporary removal of one of these barriers to continued losses in the British market, in reports of crop failures in the Argentine, coupled with the announcement that the Argentine government had fixed the price of its wheat at 90 cents a bushel, placing it on a parity with the better quality Canadian wheat. This resulted in a sudden demand for Canadian wheat and an immediate advance in price.

While this, of course, is satisfactory, while this situation lasts, it should be pointed out that it may only be a temporary situation and should not be permitted to divert attention from the more serious and long range aspects of the problem, namely the growing trend in our best market to use substitutes for bread, and the demand for fancy soft wheat bread.

Indeed, with the prices of Argentine soft wheat and Canadian hard what more closely in balance it might well be argued that there is no better time than the present to demonstrate to the British consumer that it is possible to produce the most tasty of fancy breads from Canadian wheat and to cultivate a demand for high quality along with devices for tickling the palate.

In considering this phase of the problem it should also be borne in mind that a short crop in the Argentine now may be followed 12 months hence by a bumper yield in that country and that the Argentine government's action in pegging the price of its wheat at a fairly high level may be renounced at any time, even before another crop is ready for the market.

A further factor in the situation is the likelihood of substantial, perhaps heavy wheat crops being reaped in Western Canada in the next few years, in which event this country will require expanding, instead of the recent contracting, demands for her wheat in the consumer countries. Authorities declare that the drought of the past few years is definitely broken, and with the grasshopper menace receding and a promise of a rust resistant wheat in commercial quantities within the next year or two, there is reasonable belief for anticipating that Western Canada will have more wheat to export than has been available in the past few years.

The only alternatives to creating consumer demand are to cultivate new markets or to devote attention to production of other commodities. Perhaps the solution of the problem is to be found in a combination of all.

Scarcity Of Fur Animals

Saskatchewan Reports Few Trapped Compared With Other Years

Fur-bearing animals, such as the fox, mink, otter, coyote, weasel and skunk are somewhat scarce in Saskatchewan this year compared to former years, officials of the game branch, provincial government report.

A few mink and otter have been trapped, and in the southern part of the province a drive has been on against skunks and weasels, but the numbers killed are not large.

Coyotes are fairly plentiful in central and western sections of the province but no great numbers have been killed.

Jack rabbits, a pest last year in several sections, resulting in organized drives and killing of as many as 1,000 a day, are scarcer this year. There is an exceptionally strong demand for jack rabbits this year, with prices at 16 and 17 cents. Last year the prime rabbits brought about 10 cents.

Gifts For Fire Victims

A woollen bathing suit was among the many contributions offered for victims of the Royal hotel fire in Hamilton, Ont. An "Alice in Wonderland" hair band and a picture of a 1906 automobile party were other gifts to those rendered homeless by the disastrous blaze that claimed one life.

Whittling Now Fine Art

Skill With Jackknife Gives Cowboy Lots Of Work

Whittling has developed from a mere pastime into an art. To-day there are whittling prize contests and exhibits in which the skill of the jackknife sculptors form interesting attractions. One of the jackknife sculptors whose carvings have attracted a great deal of attention is Herbert Anderson, a cowboy who once rode the range in Colorado. During his spare time and at night around the campfire "Andy", as he was familiarly known in the cow-punching days, would take out his jackknife and whittle out figures of the various characters around the camp. Indians and tough characters were his specialty. Later he gave up being a cowboy and established what he called a "trading post" where he spent all his time carving his strange wooden figures. The ex-cowboy never took a lesson in his life but his miniatures are unusually true to life. A jackknife and any kind of wood and a western masterpiece is the result.

Shipment Was Profitable

One hundred and sixty hogs were shipped recently from Calgary to Seattle. The extra prices received over the line was said to be sufficient to meet the extra freight, duty and processing charges.

Problem For Hungary

How To Bring Back Echo Which Has Been Lost

All the world loves an echo, and Hungary is mourning a lost love. The echo was last heard at Lake Balaton, where tourists used to put it through its paces and listen with delight when it repeated, with additions, their lightest utterance. This was an industrious echo. Nothing seemed to exhaust it while the supply of tourists lasted, and it would go on cheerfully all day long without a pause.

Then, as if weary of well-doing, it dwindled and died. The inhabitants of the region, disturbed by the loss of revenue, invited professors and scientists to say where it had gone, and what the possibilities were of bringing it back.

Few things are more elusive than an echo. A lost echo is hard to recover, but the scientists were not to be defeated. The professors suggested that the trees growing in the neighborhood had first blanketed the sound and finally, as they grew up, had stifled it. But a delicate problem is now set to those who would call the echo back. The trees might be cut down and the echo yet be shy. Then the lake would lose both its echo and its trees.

Seeking Information

Halifax Business And Professional Men Studying Social Credit

A number of Halifax business and professional men have organized a group for a study of the principles of Social Credit, according to Edward S. Dixon, manager of the Halifax tourist bureau.

He denied a report that a new political party for Nova Scotia was in the making. "That's ridiculous," he asserted. "We are not forming a party. We merely want to see what is in the Social Credit plan."

He added that the group, numbering about a dozen, had been formed as the outgrowth of a study club which had taken up such subjects as unemployment and health insurance. "We just want to find out what there is to the scheme," he emphasized.

Interested In Water-Lilies

American Botanist Travelled 4,000 Miles To See Rare Specimens

To see a water-lily pond kept by a policeman in his garden in London an American professor of botany has travelled 4,000 miles. The two men, Dr. Henry S. Conard, professor of Botany at Grinnell University, New York, and Constable Robert Trickett, have corresponded for five years on the subject of water-lilies—their life interest. Trickett who is a Fellow of the Royal Horticultural Society, is well known at the Royal Botanic Gardens, in Kew, where he has helped to identify rare specimens. He owns a comprehensive collection of botanical works, but his proudest possession is an autographed book of Dr. Conard's monograph on water-lilies.

India's Air Beacon Chain

Pilots flying across India will rarely be out of sight of an aerodrome on the 2700-mile route from Karachi to Rangoon with a great chain of beacon lights which have been set up along the route. Each of them will be visible from 50 to 100 miles away. At no time will an airplane have more than two hours' flying without passing a guiding light.

Warehouses At Calgary, Edmonton, Regina and Winnipeg

Proves Earth Is Round

Picture Taken From Stratosphere Clearly Shows Curved Line

New visual proof that the world is round, shown in a stratosphere picture snapped at almost 14 miles above the earth's surface, was displayed in Washington by the National Geographic Society.

Captain Albert Stevens of the United States army air corps, co-sponsor of the stratosphere flight of November 11, showed for the first time still and motion pictures taken from the balloon's record-making ceiling. Society officials declared these pictures and other scientific data obtained outrank in importance the setting of the altitude record.

The earth curvature picture shows a section of the horizon 200 miles long, more than 3 1/2 degrees of a circle and about 1/100th of the total circumference of the earth. Projected on a screen, it reveals clearly the curved line of the earth's surface.

To take this picture Captain Stevens' special camera saw a distance of 300 miles and penetrated the white haze of the distant horizon by the screening of all light except the penetrating infra-red rays. Taken approximately over Parmelee, S.D., it recorded more than 40,000 square miles of western South Dakota territory.

SELECTED RECIPES

WHOLE WHEAT BREAD

Simplified Straight Dough Method For Making Four Loaves

8 cups Whole Wheat flour
2 cups sifted white flour
1 1/2 tablespoons salt
4 tablespoons sugar
4 tablespoons butter (or lard)
1 Royal Yeast Cake
4 cups warm water, or milk or potato water.

Method

In the evening break up and soak one Royal Yeast Cake for 30 minutes in 4 cups of warm (not hot) liquid, to which has been added 4 tablespoons sugar. Mix 1 1/2 tablespoons salt with 2 cups sifted white flour and add to whole wheat flour. Melt 4 tablespoons butter or lard, and add to yeast liquid. Mix flour and liquid. Turn out on floured board and knead well, adding flour if dough sticks to board. Place dough in warm, greased bowl, cover well and allow to rise overnight, about 10 hours.

Woman Pirate

Japanese Police Capture Girl Who Terrorized China Coast

Another chapter in the lengthy saga of women pirates on the China coast was closed when Japanese police put a 27-year-old girl named Sue Nakawura on board a vessel due to leave for Japan where she will go to prison for her misdeeds.

A primary school teacher in Hokkaido, Japan, her native province, she later went to Formosa and became the mistress of a notorious pirate chieftain, Chen Pai-Lin.

She took part in hundreds of raids on junks and small towns along the coast and was known by the whole pirate fraternity, officers said. Police arrested her recently in Foochow, capital of Fukien province. She was brought to Shanghai by Japanese authorities.

A well bred man conceals how much he thinks of himself and how little he thinks of others.

PRINTING PRESSES FOR SALE

One Pony Optimus Cylinder Press, one 10 x 15 and one 12 x 18 Chandler & Price Gordon Press. Also 26-inch Guillotine Paper Cutter and one Linotype machine. All in excellent condition. Apply Box 326, Regina, Sask.

Luxurious Ocean Travel

Cunard White Star Liner "Queen Mary" Provides Wonderful Accommodation For Tourists

Never before in the history of North Atlantic travel will such lavish provision have been made for tourist class passengers as in the new Cunard White Star liner "Queen Mary".

Tourist facilities in the great liner will include stateroom accommodation extending over five decks. Eighty per cent. of the rooms will have adjoining private toilets; every stateroom will be fitted with mahogany bedsteads and supplied with hot and cold water. It will also have its own system of ventilation under the passenger's individual control.

Tourist public rooms will include an air conditioned dining saloon, nearly eighty feet long and extending the full width of the ship, a smoking room, cocktail bar, a library for 1,500 books, children's playroom containing a model railway, two lounges, one to be used on occasion as a talking picture cinema and ballroom; and a writing room.

The large swimming pool is being fitted out in blue and silver and adjoins an exceptionally complete gymnasium.

Passengers in Third Class will also find luxury in their accommodation. Every stateroom will have fitted dressing tables, overhead bedlights, hot and cold water, and ventilation controlled by the passenger. Public rooms will be tremendously in advance of anything which has previously been provided for Third Class passengers. They include two lounges, both situated underneath the bridge and providing magnificent views looking forward out to sea; a smoking room and children's playroom.

Rivers No Obstacle

Army Ants In Malaya Have System Of Crossing

That many ants in Malaya operate with military precision and march in lines that seem interminable has been reported by Carveth Wells. Rivers are no obstacles to them, he says. The main body of the army waits at the bank of the river while scouts reconnoitre and choose a bend where the current sweeps diagonally across the stream. The ants then form themselves into a ball the size of a coconut, which rolls over into the water. As the current carries the living ball across, it keeps rolling over and over, so that each ant receives only a momentary ducking. The instant the ball touches the other side it collapses, and the ants scramble ashore, reform their ranks and continue their march.

Clever Blind Girl

Although blind for the past 10 years, ever since she was 12, Agnes Horn, Edmonton, has developed her four remaining senses to a point where she can sew, knit, weave, play the piano, operate a switchboard and qualify as a first-class stenographer.

Scientist Makes Prediction That Individuals May Have Life Prolonged Indefinitely

In a scientific definition of death new in scope, Dr. Alexis Carrel, Rockefeller Institute scientist, predicted that it may become possible to suspend human life and to start it again, living several centuries. Dr. Carrel is the man who showed the physical immortality of a chicken heart, which he has kept living by itself for 24 years at the institute. For him Col. Charles A. Lindbergh last summer perfected an artificial heart which keeps whole organs alive outside the body.

Dr. Carrel's new definition was made in a talk to the New York Academy of Medicine on "The Mystery of Death."

He defined two kinds of death—reversible and irreversible. Out of the first come man's hopes for better health and longer life.

A possibility "very remote" is suspension of life.

It is reasonable, Dr. Carrel held, to suppose that part of the human personality may escape death. Present scientific facts neither prove nor disprove this after life.

All of these points Dr. Carrel emphasized in a written summary of his report to the academy.

"If science is allowed to go on eight or 10 centuries, disease may perhaps be suppressed," Dr. Carrel said. "But there is no hope of ever conquering senescence and death."

"There are only three ways to die—by failure of the heart, or of the central nervous system, or by alterations in the composition of the blood."

"Deaths are reversible or irreversible. An example of reversible death is a man stabbed through the heart. Circulation and respiration stops. The man is legally dead. However, he is not hopelessly dead. If proper treatment were applied he would resuscitate. All his organs, even his brain, are still alive."

"A few minutes later comes irreversible death. At this stage resuscitation is no longer possible, because of disintegration of the brain and the spinal centres."

Even after irreversible death has set in, he said, "the body is still almost entirely alive. The organs and tissues begin to die, each in its turn."

Dr. Carrel recited the claim of spiritists that survival of the soul has been demonstrated and the principal points in favor of this claim.

"The importance of the facts on which such speculations are based cannot be denied," he said, "but the interpretation of the experimental results seem to be incorrect. The spiritists neglect the fact of the existence of clairvoyance."

"Nevertheless, we know positively that clairvoyants are capable of perceiving past and future events. Therefore it is not possible to make a distinction between the survival of a psychic principle and a phenomenon of clairvoyance."

"There is no scientific proof, at the present time, of the survival after death of the mind, but no one has the right to say that such survival is impossible."

"It is far from being unreasonable to believe that some part of human personality may escape death."

He said some day almost every individual may die of old age only.

"Can we progress further?" he asked. "Perhaps, if we learn more about these mechanisms of life that bring about death. The problem can be attacked in different ways."

"The first one consists of analyzing the conditions responsible for the aging tissues."

"A second manner of opposing death is the search for the physiological factors that determine longevity."

These he explained as heredity, diet and mode of living, the latter two already in early stages of practicability.

"Death could also be retarded," he said, "by a rejuvenation operation. Through this operation the subject would be carried back to a previous stage of his life."

"It is not impossible that, in the course of the next two or three centuries, rejuvenation procedures will be brought within the reach of medicine."

"There is a fourth although very

remote, possibility of postponing for a long period of time the death of a few individuals."

"It is known that certain animals, such as the small arthropod, tardigrandum, stop their metabolism when they are dried. A condition of latent life is thus induced. If after a lapse of several weeks, one moistens these desiccated animals, they revive and are capable of leading normal life again."

"Although a tardigrandum contains highly differentiated cells, such as nervous cells, it is capable of standing the rough treatment of being dried. Long ago it was reported by Paul Bert that the tail of a rat, after being dried, had been transplanted with success to another rat."

"Some individuals would be put into storage for long periods of time, brought back to normal existence for other periods, and permitted in this manner to live for several centuries. We should remember the utopias of today are sometimes the realities of tomorrow."

Pacific Fisheries

Fifty-Three And A Half Million Pounds Caught In October

More than fifty-three and a half million pounds of fish were landed during October for the salmon, herring, and pilchard fisheries of British Columbia. In the total were nearly 27,750,000 pounds of salmon, more than 16,155,000 pounds of herring, and almost 9,700,000 pounds of pilchard.

Fifty-three and a half million pounds is a lot of fish in any man's reckoning anywhere, and the figures give some idea of the wealth of Canada's Pacific coast fisheries resources and the scale of fisheries operations. But big as the October figures may seem to the layman, they often exceed.

More than twenty-five different species of food fish and shellfish are taken commercially on the Dominion's Pacific and, in addition, the yearly catch includes whales, fur seals, and some fish which are used for other than food purposes. The salmon, halibut, herring, and pilchard fisheries are the "Big Four" and are mainly responsible for giving British Columbia first place among the Canadian provinces from the standpoint of the marketed value of annual fisheries production.

At the same time, several of what may be called the fisheries of secondary importance also add very tidy sums to the value aggregate.

The Western Prairie

Despite Cruel Drawbacks, The Lure Holds Man To The Soil

The prairie is like a beautiful seductive woman whose every movement is rapid and effective. She entices men with the fecundity of her soil, and once they have fallen to her charms she proceeds to crush them. In winter she tries to kill them with her frosts and blizzards; in summer she burns their crops with her sun or cuts them down with hail. At the end of summer she will freeze their wheat black as it stands unless they forestall her; yet, because men are men and she is sometimes kind, they stay with her. — E. M. Hinds in Empire Review.

The Closest Shave

Machine Will Remove Print Without Cutting Or Tearing Paper

A grinding machine of such accuracy that it will "shave" the print off a newspaper without cutting or tearing the paper has been constructed and is in daily use in a Gloversville, New York, factory. When put through this newsprint test, the machine naturally roughens the surface, but the grinding surface is so accurate that it does not wear a hole in the paper anywhere. The machine is used for grinding the surfaces of tanned hides which are used in good-class gloves.

Cure of scurvy by lemon juice was noted by physicians as early as 1745.

For Fox Breeders

Report Published Showing Result Of Scientific Investigation

An account has recently been published of the progress made up to the present on the main projects investigated at the Experimental Fox Ranch at Summerside, Prince Edward Island, of the Dominion Experimental Farms, so that fox breeders may have the benefit of the information secured. It is not considered that a final conclusion has been reached with regard to any one project, and further investigation will be undertaken, as circumstances permit, upon all the projects.

The research work has been divided into five main groups (1) nutritional requirements of foxes; (2) internal and external parasitic infestation; (3) inheritance of the inherent traits of foxes; (4) sundry physiological processes, and (5) general ranching methods.

The nutritional problems have been approached from five different angles—(1) the influence of the different contents of the diet, such as protein, fat, vitamin, caloric value; (2) determination of the normal annual fur cycle, and the dietary factors that induce the most favourable results during the entire annual cycle; (3) determination of the normal annual cycle of breeding foxes, and the dietary factors that induce the changes in a most natural manner;

(4) the fitness of the seasonal nutritional and other environments of foxes in the wild state to meet the seasonal functions and the changes of foxes in captivity; and (5) disturbances due to the deficiencies in the diet, the so-called deficiency diseases.

These and other matters of importance to the fox breeders of Canada will be found in the progress report of the ranch by G. Ennis Smith, the superintendent, issued by the Publicity and Extension Branch, Dominion Department of Agriculture, Ottawa.

Newspaper Advertising

Is Dominant Force In Bringing Buyers To Stores

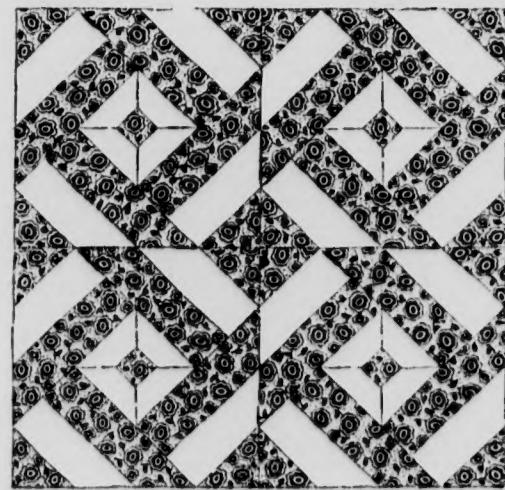

An important statement was made in a recent week at a conference in New York city of the representatives of associated business papers. Ernest C. Hastings, editor of Dry Goods Economist, declared that the newspaper was the dominant force in bringing buyers into the retail stores. Department stores spent approximately \$150,000,000 last year for newspaper advertising, he said, twice as much as was spent in other forms of advertising. "Newspapers always have been and always will be the dominating force to bring people into the store," Hastings said. "Without local papers, the department and dry goods stores of this country would soon become as dead as a morgue."

He: "Did anyone ever tell you how beautiful you are?"

She: "No."

He: "Then where did you get the idea?"

Easy to Cut -- Easy to Piece

Household Arts by Alice Brooks

Two Materials Make a Striking Quilt Colonial Pavement

PATTERN 5501

Winter's the time for quilting, and how fast the hours fly when one is engrossed in so profitable an occupation. "Colonial Pavement" takes its inspiration from the rich mosaic pavements of Washington's time. It's an easy quilt to cut and piece, for with most patches the same width, the material can be cut in strips. Straight pieces are always easier to sew, too; with this quilt you start at the centre. Just two materials are required.

In pattern 5501 you will find the Block Chart, an illustration for cutting, sewing and finishing, together with yardage chart, diagram of quilt to help arrange the blocks for single and double bed size, and a diagram of block which serves as a guide for placing the patches and suggests contrasting materials.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave., E., Winnipeg.

There is no Alice Brooks pattern book published

Definite Steps Are Taken Towards Right Of Canada To Amend Its Constitution

One of the anomalies of Canada's political structure was a bit nearer elimination as a result of the Dominion-provincial conference. The gathering initiated definite steps towards the exercise by Canada of the right to amend its own constitution, a right enjoyed by other Dominions of the British Empire.

The resolution on constitutional amendment was adopted by the committee by a vote of nine to one, the negative vote being cast by Hon. J. B. McNair, attorney-general of New Brunswick. An official statement said Mr. McNair was unable to agree with the resolution in its entirety but it was not learned what his objection was.

Hon. A. W. Roebuck, Ontario attorney-general, at the opening of the conference, presented a memorandum outlining in a general way the methods he proposed should be adopted in facilitating amendments to the constitution. At the close of the committee's sessions he presented the resolution setting out his ideas in concrete form.

The province of Quebec has stood out against Canada possessing the right to amend the terms of the British North America Act, the national constitution since 1867, but at the conference Premier L. A. Taschereau of that province announced he had withdrawn his opposition. New Brunswick was the only province to raise a dissenting voice to the resolution of the conference's constitution committee favoring constitutional reform on a broad scale.

The British North America Act is a statute of the British parliament

and can be amended only by the British parliament. It defines the respective powers of the parliament of Canada and the legislatures of the provinces.

The decision arrived at by the conference was that the B.N.A. Act stood in need of amendments now and might need further amendments in future and that Canada, like other Dominions, should have the right to enact the amendments without recourse to the British parliament.

The chief ground of Quebec's reluctance to consent to Canada taking over the control of its own constitution has been fear of the invasion of the rights enjoyed by the French-speaking minority. Under the constitution as it stands these are guaranteed and there has been a tendency to regard the British parliament as less likely to be swayed by racial antagonisms and prejudices than a Canadian authority.

Then, too, there is the claim that the United Kingdom is bound by the ancient treaty with France under which Canada was ceded to Great Britain to respect the rights of French-Canadians to the free use of the French language and the free practice of their religion.

This viewpoint has made Quebec prominent among the provinces in the assertion of provincial rights and in opposition to any measures which might cut down the powers of the provincial legislatures.

In commenting on the report of the constitutional committee of the conference Premier Taschereau said he had changed his opinion on the constitutional question. The reasons were the generosity of all federal administrations, of whatever political persuasion, and shown towards minorities and evidences of a similar attitude on the part of provincial governments from the time of Confederation onwards.

The resolution on constitutional amendment was adopted by the committee by a vote of nine to one, the negative vote being cast by Hon. J. B. McNair, attorney-general of New Brunswick. An official statement said Mr. McNair was unable to agree with the resolution in its entirety but it was not learned what his objection was.

Hon. A. W. Roebuck, Ontario attorney-general, at the opening of the conference, presented a memorandum outlining in a general way the methods he proposed should be adopted in facilitating amendments to the constitution. At the close of the committee's sessions he presented the resolution setting out his ideas in concrete form.

The resolution suggested an imperial statute be obtained, with the approval of the Dominion and provincial parliaments, empowering the Dominion to amend the British North America Act without recourse to the imperial parliament, with certain reservations and under certain conditions.

The Dominion parliament would have power to amend the act with respect to matters which concern exclusively constitution and privileges of the house of commons and senate of Canada, the specific clauses being set forth.

With respect to all matters pertaining to the provinces exclusively, and in all matters of mutual concern to the Dominion and the provinces, amendments would be made only by joint action of the house of commons and senate, and of two-thirds of the legislative assemblies and legislative councils if any, representing 55 per cent. of the people of Canada.

Humanity Is Selfish

Inclined To Save Own Possessions At Cost To Others

Chinese peasants near Hiachow, in Kiangsu province, broke the dykes of the Yellow river the other day to save their farms from being flooded. Their stunt worked, and their farms were saved—but the river inundated an enormous area downstream, and as a result more than 600,000 people have been rendered homeless. It is seldom that the shocking cost of the normal human instinct to save one's own regardless of the price others must pay is more vividly illustrated.

And yet these Chinese peasants were not, after all, much worse than their more enlightened fellow humans in other lands. What about rich industrial nations which create widespread want by reducing production to preserve individual investments? What about great agricultural communities which destroy ripened crops to protect prices, while other folk go hungry? The motivation is the same—and the effect is not, after all, so very different. — Vancouver Sun.

Live In Lonely Splendor

Explorer Finds Tribe Of Yodellers In New Guinea

That a tribe whose men speak in pretty yodelling tone and carry bows and arrows, stone axes and human daggers has been discovered in the White River Valley, New Guinea, has just been reported to the Government of Australia by M. Hides, an explorer. Reaching the valley, Hides and his party were held spellbound by the scene of wild and lonely splendor. "We have never seen anything more beautiful," states the report, "and found a population such as one sometimes dreamed of." All the people were short of stature, clean, light-skinned, and wore girlish mops of brown fuzzy hair adorned with flowers. Friendly to the expedition at first, the people later refused it food, and the explorers had to fight for sustenance.

Ireland's First Steel Train

The first all-steel railway train in the Irish Free State has just been placed on the run between Cork and Dublin. It consists of five large passenger coaches, a dining and buffet car, a baggage car and a mail car. The coaches are beautifully decorated.

THE NEW PARLIAMENT
and
ITS OPPORTUNITY

Business conditions are improving
in Canada. It is no longer im-
possible to expect a balanced
budget or to hope that the burden
of relief will be diminished by the
natural processes of re-employment.
Even the railways are earning
more money.

But no informed student of Can-
adian affairs can remain unaware
that there are certain basic ills in
our financial and economic frame-
work which will not yield to ordinary
recuperative remedies. They
demand drastic and heroic opera-
tions. They call not only for wis-
dom but for a high order of courage
on the part of the various Govern-
ments, Provincial as well as Federal.

The new Federal Government of
Canada embraces a number of
clever men fully capable of judging
wisely the causes that are plunging
the country to its destruction. They
will clearly envisage these stagger-
ing problems and they will probably
be as good judges as any in the
choice of solutions.

Will they have the courage of their
convictions?

Something will depend, in our
opinion, on the obstacles that they
will be called upon to surmount.
Will they find themselves helped
forward by a nation spirit of co-op-
eration, or will they be confronted
by a carping and partisan opposi-
tion? It will make all the differ-
ence in the world. There is not
one of these pressing problems
which does not lend itself danger-
ously to exploitation by partisan
critics—by local grumblers—who
are seeking opportunities to em-
barrass the Ministers and to arouse
uninformed sectional feeling against
what must be in their very nature
heroic measures. On the other
hand, good-will all round and an
eye single to national advantage
can enable any Government to take
political risks and to set national
advantage against sectional sacri-
fices in justification of strong action

We, for our part, are quite willing
to trust this Government in giving
a fair trial to any plans for
Recovery, within reason, on which
it is ready to risk its very existence.
We do not fear that these newly
installed Ministers will be either care-
less or reckless or lacking in earnest
study when making their choice
of measures which must save the
country if they are also to save
their several reputations. They
have four or five years in which to
work out whatever schemes they
may select. They are thus protec-
ted from the always serious peril of
having to submit a half-baked ex-
periment to a less than half-infor-
med electorate.

Time is on their side. A rising
tide of national recovery is on their
side. The apparent return of world-
wide prosperity is on their side.
They have the best possible chances
for success and the most compelling
reasons for taking the long
view and giving to every task the
deepest and most searching consid-
eration.

They have an unmatched mandate

from the people. Nothing like it,
Federal and Provincial, has ever
been seen in our history. A Domin-
ion-Provincial Conference is today
more like a family gathering than it
could ever have been before. Part-
yism automatically disappears.
This malign spirit can be revived
only in the course of debate on the
floor of Parliament and in the Pro-
vincial Legislatures.

* * *

It should not be revived anywhere.
These assemblies, too, should be
family gatherings. They should
be composed of Canadians who
have forgotten their party affilia-
tions or their previous conditions of
mental servitude, and who have
come together as sincere and earn-
est men to face the most tremen-
dous series of stubborn problems
that this young country has ever
known. Where political risks must
be taken, they should be met by a
united front. Sectional selfishness
should find no comfort on either
side or in any corner of the House.

If this new Government, with its
Five Year Plan in the hatching, is
as wise as its composition would in-
dicate, it will get promptly to work.
The spirit of co-operation for which
we plead will not last forever. The
day will come when our sectional-
ists will be as selfish as ever and
our partisans will smell the battle
from afar.

But today we can be all Canadi-
ans. While this honeymoon spirit
prevails, a wise Government will
perform whatever arduous and dan-
gerous and back-breaking tasks
may lie before it. Then there will
be ample time for the wounds to
heal, for the national benefits of any
drastic reforms to develop and for
these national benefits completely
to over-shadow and erase minor
sectional grievances.—Montreal
Daily Star.

"The Grain Forum" Radio Programs

"The Grain Forum" radio program, which commenced over a network of Western stations Friday, December 6th last, is a half-hour feature sponsored by the Northwest Grain Dealers' Association and the Winnipeg Grain Exchange. It commences at 9 p.m. Central standard time and 8 p.m. Mountain standard time.

As its name implies, "The Grain Forum" is intended for the public discussion of matters of special interest to grain producers. Thus, in the series to date, brief talks have been given and questions invited on the following subjects: "The World's Foodstuffs and the Place Occupied by Wheat," and "The Winnipeg Grain Exchange—What It Does." Last Friday the subject was, "What the Winnipeg Grain Exchange Does Not Do." This will be followed tomorrow evening, January 17th, by talk on "The Factors That Govern and Influence the Price of Wheat." Later in the series another interesting subject will be discussed, namely, "Canada and Her Competitors."

There is, of course, the danger of a radio program developing into a

one-way affair, but the idea of this particular "Grain Forum" is that producers and all others interested should be represented in the discussions. Therefore, questions relating to all grain problems, or to the subjects covered in the radio talks, are invited from all listeners-in, and it is the intention to deal with these questions, so far as possible, over the air. All inquiries, in any event, are answered by mail.

But this does not cover all the radio activities of the "Grain Forum," for pleasing and popular music is an essential part of the program.

One other feature should not be overlooked. A special competition is now under way for bona fide growers of grain, or members of their families, who are asked to submit 10-minute manuscript speeches on either of the following subjects: "Some Major Problems In Grain Growing," or "Some Major Problems In Grain Marketing." Valuable cash prizes are to be awarded, fifteen in number, for the winning entries, and it is to be noted that free expression of opinion is welcomed and will not affect the opportunity of winning a prize. One of the winning contestants will be invited to Winnipeg as the guest of the sponsors of the "Grain Forum."

"The Grain Forum" welcomes constructive criticism, and anyone who listens-in on Friday evening

from 9 to 9:30 Central standard time (8 to 8:30 Mountain standard time) can thereafter consider himself or herself enrolled as a "candid critic," for the "Grain Forum" is anxious to receive comment from its already remarkably extensive and steadily growing radio audience.

Notice
M.D. of Westerdale
No. 311

In an address given by Mr. Longman, Field Crop Commissioner for the province of Alberta, to the Delegates attending the Municipal District Convention at Edmonton recently, Mr. Longman called their attention to the serious situation with regard to the shortage of seed grain throughout the Province and requested every farmer to take steps at once to provide himself with seed grain before it is shipped out of this district or the Province.

The Council of M.D. 311 wish to impress upon the farmers of the district the urgent necessity for complying with Mr. Longman's request, otherwise, it may be impossible to procure the seed necessary to take care of next year's requirements.

WEEKLY SERMONETTE

WORLD HAPPENINGS BRIEFLY TOLD

U.S. Secretary of the Treasury Morgenthau announced the receipt of \$230,453 from Finland in full payment of its war debt instalment.

Twenty-six men were drowned or frozen to death in a blizzard which swept Iceland recently. Twenty persons still are missing.

New Zealand government railways have ordered eight streamlined electric locomotives to be built by the English Electric Company of London.

A stone cross and small memorial chapel will be set up on the bank of the Lake of Lucerne where Queen Astrid of Belgium was killed in a motor accident.

Arthur Henderson, former Labor leader and president of the world disarmament conference, left a net estate of \$115,000, it was revealed. He died October 20. The entire estate was willed to his widow.

Primo Laurencetti may be Italian but he's not a Fascist. And that's why he was in hospital suffering from severe head and body injuries. He shouted: "Down with Mussolini!" at a Fascist meeting in Montreal.

In a round-up of "scorchers" police detained 5,253 Berlin bicyclists. The purpose was to show them that bicycling speeding will not be tolerated. All were warned, and 2,832 were fined.

A gold nugget weighing 13 kilograms and 787 grams (about 30 pounds), declared by the Soviet press to be the largest ever found anywhere during this century, has been discovered in the Ural gold fields.

More people were killed on British highways during election week than in any other week this year. The total of 165 was 32 more than the previous week and 23 more than the corresponding period in 1934.

Saskatchewan Rhodes Scholar

James Donald Weir Of Saskatoon Has Been Named

A brilliant student both at high school and college, James Donald Weir, son of the University of Saskatchewan's registrar, and native of Saskatoon, was named as the Saskatchewan Rhodes scholar. Mr. Weir has specialized in geology. He is a nephew of John Weir, dean of law, University of Alberta, and also of Hon. G. M. Weir, minister of education in B.C.

In an unusually able group of applicants for the scholarship the committee found the choice difficult.

It is Mr. Weir's intention to pursue advanced work in historical geology and in the school of geography. Mr. Weir's uncle, John Weir, now dean of law at the University of Alberta, was a Rhodes scholar who went to Oxford just after the war and attained distinction in his studies there.

Pioneer Woman Physician

Was One Of The Earliest Women Doctors In America

Illness due to advanced age brought death at St. John, N.S., to Dr. Mary McLeod, 83, first New Brunswick woman to become a doctor and one of the earliest women doctors in North America.

Her medical career was largely concerned with hospital work in the United States. A period of gradual retirement began with her return to New Brunswick 25 years ago.

After graduating from Northwestern University's women's medical school at Chicago in 1892, Dr. McLeod became superintendent of a large hospital in Detroit, continuing similar work in Idaho and western United States. She was born at Caronville, N.B.

Used Old Stamps

Canadian stamps of 1897 and 1898 were used to pay the cost of sending a letter from Vancouver to Montreal in a recent week when a Montrealer received an envelope bearing a one-cent 1897 jubilee stamp and the two-cent "Xmas 1898" stamp.

The soft answer that turns away wrath should be used early in the conversation.

Ninety per cent. of the milk sold in American cities is pasteurized.

New Royal Bank Appointments

B. L. Mitchell, James Muir And Harold G. Hesler Made Assistant General Managers

Appointment of Mr. Burnham L. Mitchell, Mr. James Muir and Mr. Harold G. Hesler, as Assistant General Managers of The Royal Bank of Canada, is announced.

Mr. Mitchell, a native of Merigomish, N.S., and since 1934 supervisor of Ontario branches, becomes assistant general manager following a long and extensive career with the bank in many parts of Canada and Newfoundland. He joined the Union Bank of Halifax in 1903, serving as a junior at the New Glasgow branch. When the Union Bank was absorbed by The Royal Bank of Canada in 1910, Mr. Mitchell was moved to Halifax, and two years later became accountant of that branch. In 1915, he was appointed manager of the St. John's, Newfoundland branch, following two years' service as assistant manager there. Between 1919 and 1925, he served successively as manager at Halifax and at Vancouver; in 1929 he was appointed manager at Toronto; and five years later supervisor of Ontario branches. As assistant general manager, Mr. Mitchell will continue to supervise Ontario branches from headquarters at Toronto.

Mr. James Muir, for the past four years general inspector of The Royal Bank of Canada, is a native of Scotland. Like Mr. Mitchell, he has been engaged in the profession of banking since boyhood, and has served the bank in the Dominion and New York. Mr. Muir joined The Royal Bank of Canada at Moose Jaw in 1912, after serving three years with the Commercial Bank of Scotland, Ltd., and one year with the chartered bank of India in London, England. In 1916 he was transferred to the inspector's department at Winnipeg, and later in the same year became accountant in the Winnipeg Grain Exchange branch. In 1917 he was transferred to the Credit Department, Head office, and appointments as inspector, supervisor's department, Winnipeg, and as assistant supervisor at New York, followed in quick succession. His appointment as general inspector, with headquarters in Montreal, followed in December 1931.

Mr. Harold G. Hesler, secretary of The Royal Bank of Canada, was born in Humberstone, Ont., and joined the Welland branch of the bank as a junior in 1910. He served in various capacities in several branches throughout Ontario until 1915, when he was transferred to Winnipeg. After enlistment in 1916 and service overseas, he rejoined the bank at the Havana branch in July 1919, and shortly after was appointed accountant at Cienfuegos, Cuba. The following year he was transferred to the supervisor's department, Havana, and in 1928 became joint manager of Havana branch. In 1930, Mr. Hesler was moved to head office, Montreal, where he has since been closely in touch with the bank's foreign business, having visited personally many of the bank's foreign branches as well as the more important offices across the Dominion. He was appointed general inspector in 1931.

The appointments of Mr. Mitchell, Mr. Muir and Mr. Hesler become effective immediately.

The Folly Of Speed

Fast Driver Has Decided It Is Not Sensible

H. V. O'B., in Chicago Daily News, says: "One of the big insurance companies is inviting people to take a 50-mile-an-hour pledge. I am tempted to accept the invitation. I have done more than my share of fast driving. I have scooted across open country at 80 m.p.h. and better; but I've come to the conclusion that there is no sense in it. The normal cost in fuel, tires and mechanical wear is doubled at this speed. It is reasonable to suppose therefore, that the wear and tear on the driver is no less considerable. I'm inclined to believe that 400 miles in seven hours will harden the arteries much more than the same distance in 10 hours."

An Open Challenge

Neal O'Hara, in the New York Post, says: "An erudite lady challenges us (or anyone else) to pronounce correctly these relatively common words: calliope, masseuse, fiance, cello, lingerie, bourgeois, decollete, elite, porte cochere and maraschino. And for proper names, try getting these exactly right: Il Duce, Sinn Fein, Paderewski, Fas-cisti, Ypres, Bolsheviks, Les Misérables, Ysaye, Il Trovatore, Thais, Dvorak and Jascha Heifetz.

Some zoos buy their snakes at so much a foot.

Barley can be grown from the Arctic to the tropics.

SEES THE KING

Sir Robert Vansittart, permanent British Under-Secretary of the foreign office, who participated with Sir Samuel Hoare and Premier Laval of France at the meeting in which the joint peace plan was drafted, had an audience with the King. The peace plan has been generally condemned by other members of the League.

Jews In Germany

Further Restrictions Being Considered By The Government

German Jewish business men and industrialists face new restrictions in measures which will be considered by Chancellor Hitler and his cabinet.

The new measures would circumscribe the economic status of Jews in Germany as the laws decided upon at the Nuremberg Nazi congress circumscribed their civil position.

Among the measures to be considered are the following:

1. An order that Jewish stores prominently show a Hebrew inscription or a star of David.

2. A ban on Jewish stockholding in German firms.

3. An order that no Jew may own land in Germany, or buildings constructed on German land.

4. A law forbidding Jews to reside in towns having a population of less than 20,000.

Alberta's Wheat Crop

Frost Damage Reduced Original Estimate By 2,000,000 Bushels

Alberta wheat crop has been reduced 2,000,000 bushels from the original estimate on account of frost damage.

Yield for the province is estimated at 14 bushels per acre, even bushel less than in 1934.

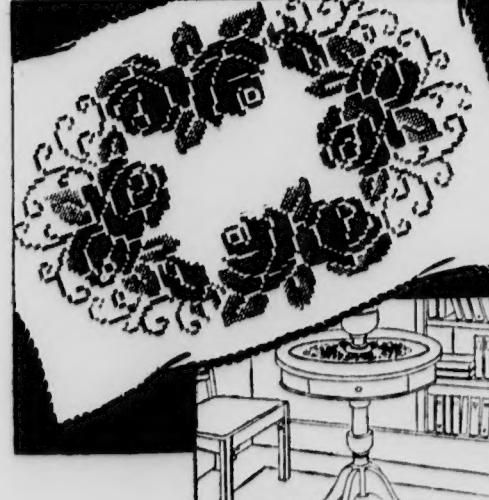

About 32,000,000 bushels will grade No. 1 and 2 Northern, 21,000,000 grading 3 and 4 and 52,000,000 only 5, 6 or feed.

Wife (reproachfully): "John, you're kinder to dumb animals than you are to me."

Fed-up Husband: "Well, you try being dumb and see how kind I'll be."

Japan's hobby seems to be collecting China.

Cross Stitch Roses Bloom Quickly

Studied Canadian Beaver

Wife Of Famous Grey Owl Knows All About Them

A slender, dark-eyed Indian woman shares with her famous husband, Grey Owl, the task of protecting Canada's beaver. While Grey Owl is touring England, lecturing on Canada's wild life conservation program, his young wife is busy at her Adjawan Lake home, in Prince Albert National Park, taking care of her precious charges, "Rawhide" and "Jelly-rol," far-famed beavers.

Mrs. Rose Grey Owl confesses to three life objectives—the welfare of her four-year-old daughter, Dawn; the writing of a specialized play, and the rehabilitation of her own people north of '54. She is an intrepid prospector. A picturesque figure in a canoe that takes her on lone trips to far-off fields along the fringe of the north country, she hopes some day to strike it rich and provide her people with civilization's best offerings.

Nature will comprise the background and medium for her proposed play. The plot has a striking resemblance to her own and her husband's life story. When completed, she hopes to direct it herself to assure accurate presentation of educational features.

Few men know the beaver as well as Mrs. Grey Owl. With her husband she spent many years roaming the forests of Ontario and Quebec. Together they made a study of the animal adopted as Canada's national emblem. Wherever they found them needing help they turned doctor and nurse.

Their little brown furry friends have been known to swim to their canoe half a mile from shore and to come at a call from long distances. The beaver have not been as painstaking as usual in the construction of their winter quarters at Adjawan Lake. Mrs. Grey Owl predicts a warm winter, a reassuring fact to her as she will spend the next three months in comparative seclusion.

Native Of Abyssinia

Coffee Plant Grows Wild But Cultivation Is On Increase

The coffee plant is a native of Abyssinia, where it grows wild. It has been used as a beverage in that country from time immemorial. There is a theory that the name is derived from Kaffa, an Abyssinian province. The production of a cultivated type of coffee is on the increase, and a certain amount is exported.

"Pardon me," said the stranger, "are you a resident here?"

"Yes," was the answer, "I've been here goin' on 50 years. What kin I do for you?"

"I am looking for a criminal lawyer," said the stranger. "Have you any here?"

"Well," said the other, "we're pretty sure we have, but we can't prove it."

Twenty-five thousand microscopic slices were made of the brain of Nikolai Lenin, father of Communism, for study by the Soviet Brain Institute.

The institute, founded in 1927, has 180 adult, 300 child and 470 animal brains under study. Results will be used for making a "brain atlas" to serve educational and scientific purposes.

Lenin died in January, 1924. His embalmed body is still preserved in a mausoleum in Red square, where it is on view.

Soviet scientists are making a close study of the brains of unusual persons and types, hoping to throw more light on behavior. It is customary for any Russian leader or thinker to will his brain to the institute.

The Strange Request

Strange requests for aid frequently reach the Shanghai police—but that of Mr. Kataoka, of Nagasaki, Japan, beats all records. He asked the police to buy him a sweepstakes ticket for the next Shanghai races and to send him details of prices, chances of victory and date of the races. His letter was marked "Urgent" in red ink.

An electrical company announces that radio can cure lame muscles and joints. What about aching ears?

Penguins swim 100 miles a day without exerting themselves.

The Great Pioneers

Must Extend Our Social Vision In The Proper Direction

Famous advances are being made on the frontier of the mind. Scientists, the great pioneers of the last quarter century and the true internationalists of our day, have extended our physical vision into ever vaster star swarms and into their constituents, and ours—the hurrying atoms, which seem in their dimmutive marvels indeed like creatures of Queen Mab. Tireless medical research has found cures for diseases held incurable through the ages. But the common cold is still with us—and what a plague of common greed, common brutality, common lust for power! Are we not too apt to forget in the rush of complicated problems, and the din of their big words how much any attempt to better our lives must rest upon large success in dealing with these rude ills, plain to the simplest soul? I do not believe that such ills will abate until we extend our social vision to the proper direction.

Toronto Star Weekly Has Contest Offering \$3,000.00 In Cash Prizes

Testing Readers' Knowledge Of Canadian Geography—531 Cash Prizes

—First Prize \$1,000

Readers of The Toronto Star Weekly are being given an opportunity to put their knowledge of Canadian Geography to practical test. Generous cash prizes are offered in a contest which this great Canadian weekly newspaper is conducting, answers to which are names found on the map of the Dominion.

The paper is printing four puzzle pictures each week for 12 weeks, 48 pictures in all. Each picture suggests the name of a Canadian city, town, lake, river or other geographical feature. The problem is to select the correct name to suit each picture and the reader sending in the greatest number of correct solutions will be awarded first prize. First prize is \$1,000; second prize \$500 and there are 531 prizes in all, all cash prizes.

The contest starts January 4th and is open to all readers of The Toronto Star Weekly. As many members of one family as wish to do so may enter the contest and any person may send in as many entries as he or she wishes. Rules are very simple. The contest will offer considerable entertainment to readers of this paper, as well as being a test of the readers' knowledge of Canada while the generous cash prizes are well worth working for.

Will Study Brain

Soviet Institute Will Examine Brain Of Lenin

Twenty-five thousand microscopic slices were made of the brain of Nikolai Lenin, father of Communism, for study by the Soviet Brain Institute.

The institute, founded in 1927, has 180 adult, 300 child and 470 animal brains under study. Results will be used for making a "brain atlas" to serve educational and scientific purposes.

Lenin died in January, 1924. His embalmed body is still preserved in a mausoleum in Red square, where it is on view.

FLEMING'S FOLLY
— BY —
LAWRENCE A. KEATING

SYNOPSIS

Here is an absorbing and exciting story of a fight against stubborn prejudice and a bitter personal malignancy—of a girl and a man battling ridicule, sabotage, bullets, and the treachery that would turn them against each other.

The story opens with Link Fleming addressing a meeting of Boone County cattlemen, called together with the object of forming an irrigation company.

Roper Kilgo, the boss of the Rawhide and nearby ranges, who seemed to approve the plan, but was really opposed to it, had forced Soak Toney, a derelict mining engineer, whom Kilgo knew would be called upon to give his expert opinion in favor of the scheme, to reverse his earlier endorsement, and declare that irrigation in Boone county so far as Hamilton's plan was concerned, was only a new-fangled way to waste money.

(Now Go On With The Story)

CHAPTER II.—Continued

As she did not answer at once Roper followed her eyes. "Fleming's been tryin' to hoggie the boys on a scheme to water the whole county. Can yuh beat that? Crazy, I call it. But he's bullheaded, ain't yuh, Link? Might have put it over, too," he chuckled derisively, "but Soak Toney shore pricked his balloon, and saved the boys about sixty thousand bucks, I reckon!"

There was a brief silence. "I know about it, Roper," Helen returned quietly. "I'm in favor of irrigation, too. It's the only way to improve our ranches."

"In favor of it? A loco stunt like that? But how—I mean, gosh, where'd you hear about it?"

"Link talked irrigation to me a long time ago and I told him nothing doing. Then," Buzz rasped accusingly, "he figured he could work on my sister just 'cause she's a girl. Prob'ly thought if he got her talked into it, she'd swing me. But by gosh I won't!"

"Oh, Buzz, please don't make a scene!"

Kilgo rubbed his chin. "So Link wrote her, eh? That's shore plenty o' crust, correspondin' with your sister and hidin' it from yuh!" He jerked his ear as if reflecting swiftly. "Darned if I'd stand for that, Buzz. I'm danged if I would!"

"Hold on. There wasn't anything unhandy about it at all," the Star Loop owner declared coolly.

Helen hung back as Kilgo reached out to take her arm. "I want to talk this over with Mr. Fleming. You see, I'm really serious about it. Why, it will be wonderful—it will make our spread twice as valuable. I—"

"Yuh got no call to write my sister!" This fact seemed to stick in the man's mind, spurring him to deeper wrath as seconds ticked away. Buzz's face was dark, and the twitching of a cheek muscle showed him scarcely able to control himself. He turned on Roper. "Has he?"

"Nerviest thing I ever heard! Don't know's I like it myself," he growled. "Everybody knows Helen and I practically had things settled before she went away with your dad. I been waitin' two years and gettin' ready. 'Course, I ain't her brother like you are. It's up to you how yuh aim to take this here interference."

"Please!" Embarrassment sent waves of crimson stealing over her smooth cheeks. "Link, if you are starting to your spread," she said

hesitantly, "I—I'm going that way too. Perhaps we could talk about it and—"

"You're not ridin' out with him; I ain't goin' to have it!" He swung on Fleming. "Just about yore size—this sneakin' lobo stuff!"

Link had almost reached the limit of his patience. It was only by exerting every ounce of control that he restrained himself from lashing out with a hard fist at the man's chin. His gaze riveted on the glittering blue-grey eyes as with set jaw he answered in a cold, level tone.

"You've got this all wrong. Our correspondence started by accident. And I don't like insults. Is that plain?"

Buzz stepped back. Malevolence glittered its frosty warning as swiftly he noted the position of Buster Townsend, who stood waiting for his employer, then of Helen, Kilgo, and Link. A transformation seemed to take place inside the man. His hollow cheeks drained of blood and his lower lip quivered with unspeakable fury.

"Damn you!" he screamed. "I'll teach you to monkey with my sister and plot to grab our spread!"

Suddenly, loosing a wolfish snarl, he plunged for his Colt.

"Buzz!" Helen flung out both hands to stop his draw.

Fearful lest she be shot, and wholly ignoring his own imminent danger, Link also plunged forward to grasp her shoulder and jerk her out of harm's way.

Wham! The room reeled with the force of a pounding explosion. A grey cloud of acrid powder smoke wafted to their nostrils, blurred vis'ion. Fleming, unhurt, probed puzzledly from one taut countenance to the next. He staggered and all but lost his balance as Buster struck him with blunt force, both hands clutched to his middle.

"I—got it!" he gasped. Twisting and writhing in agony, the Star Loop foreman lurched two steps, then sprawled on his side at their feet.

CHAPTER III.

Helen Hamilton uttered a horrified gasp. Kilgo's expression of satisfaction changed swiftly to dismay as he fell back, startled. Two men on the sidewalk outside halted to peer through the hazy window. Spying Buster on the floor, they came on the run through the front door of the hotel.

As for Buzz, the report of his own weapon had the effect of a severe shock. With brows knit, he stared from it, a wisp of smoke curling from its muzzle, to Townsend. His seamed face swept grey. He flung a quick look around, whirled, and started out of the place.

Link would have made after but just then the newcomers seized Hamilton. With a hard jerk Sheriff Stephen wrenched the Colt away and jammed it inside his own belt. The next moment Ames had his man prisoner with manacles locked over both wrists.

"Dead, Link?"

"No. But he's hurt bad. Seems to have got it in the stomach." He turned to Gaines, the hotel clerk. "Ab, run for Doc Slater, quick!"

Townsend's chubby face was pale under its coat of range tan, and his eyes were closed. He had ceased twitching to lie as one in a coma. Link stooped, picked up the man as if he weighed half his hundred and seventy pounds, and strode with him across the lobby to a leather lounge. There, as tenderly as possible, he laid him down.

"Give him a shot o' this, Link." With shaking hand Roper offered a half-filled flask he had taken from his pocket. Fleming accepted it, and after extracting the cork, pressed the bottle opening to Buster's lips. The brown whisky trickled down his cheeks but some, Link thought, penetrated the tightly-set lips.

There was a bustle behind as poly Dr. Slater puffed in. "Get back, gents! Sheriff, better clear the lobby. One thing the human animal sure needs to live—air. Now then!" The practitioner dropped his bag and frowning, got on his knees. He glanced over his shoulder. "Bring that girl here. Women are handy at this kind of thing. Need a man too. Here, Kilgo, you can hand me the instruments."

"Wh-what goin' to do, Doc?"

"Operate, of course! Think this fellow can digest lead? Hm," he mut-

tered, shaking his head doubtfully. "Don't know... Bleedin' pretty hard. Bad place, too."

Helen Hamilton was at Slater's side, her lips pressed firmly together, trying to force herself not to shudder at the death-like pallor of the man her brother had shot. Doc looked at her and grunted.

"You got grit enough, I reckon. Don't be scared at lots of blood."

"Doc, I—" Roper gulped while he kept his eyes averted from the wounded man. "I don't know if I can—Gosh, I'm liable to keel over!" he exclaimed in panic.

The physician gave a disgusted snort. "Here, somebody else—Link! Hold this pan. Thanks, Gaines: that's using your head for somethin' useful. Only man that thought of hot water in the whole crowd! Now then. Easy, Buster. . . Won't hurt much. Ah, it's there, eh? Wonder if it went clear into . . ."

There was a moment of taut silence. Fleming's eyes met those of the girl over Dr. Slater's shiny bald plate. Her face was white as a sheet of paper, but when he nodded questioningly toward the door she shook her head.

Link himself by no means relished this sort of thing. Buster was groaning and gasping in pain, fearful of the doctor's very touch. Suddenly Slater turned around.

"Ain't goin' weak like Kilgo, are you?"

"No."

"Link," he whispered, "I got to try a damned delicate operation to save that boy's life. Need two of you. Think the girl can stand it?"

"It was her brother shot Townsend, Doc. But I reckon she's the game kind."

He whistled. "Her brother? That scamp Stephen grabbed? Ought to make him watch it, that's what Ames oughta do!" While he spoke he watched Buster carefully. "I ain't got a drop o' ether or chloroform. Give me that gun of yours, Link."

Fleming drew the weapon and handed it over, butt first. Puzzled as to Doc's intent, he watched him twirl the Colt until he grasped its cold barrel.

. Suddenly Doc leaned toward Townsend. He struck out, butt first. There was a low thump that made Buster jerk. Then he relaxed, unconscious.

Helen Hamilton clutched hand to her throat. But she stifled the cry that sought freedom.

She was game!

"Now we start. Young lady, you sponge that wound. Careful! But keep it open and clear; I got to see what I'm doing. I'm after that slug. Might take a minute to find it. Hated to soak him like that but he couldn't have stood the pain. Nobody likes cold steel pokin' around their stomach."

As he spoke he fished a sharp, gleaming instrument from his kit, dipped it in the whisky bottle, and leaned over his patient. He probed until blood covered his instrument, then withdrew it. Helen's face was like a pale mask and her dark eyes betrayed the sympathetic pain she felt.

Doc Slater tried again. "Uh!" he grunted. "Here, girl—drop that rag. Put your two fingers—so. Wait now. . . ! all right—pull easy! Ah-ah!" Again he busied himself, grunting. But his quick, deft fingers made short work of closing the wound and bandaging it.

"Fine. You can tell your husband when you get one, you operated on a man. Why, Link, you pulled the lead

NABOB

right out of him, and—Hullo!" Slater exclaimed.

With a gasp that wavered and died Helen stepped back, her eyes closed. But for Fleming's watchfulness she would have fallen. He gathered her slight body in his arms, hurried to another lounge, and laid her gently upon it.

(To Be Continued)

Royal Castle Now Hotel

Was Once Home Of Queen Alexandra
In Denmark

Once the home of the late Queen Alexandra and her sister, the late Empress Dagmar of Russia, mother of the murdered Czar, the beautiful royal castle of Hvidore, in Denmark, is to be converted into a hotel and restaurant. Queen Alexandra acquired it in 1905. Two years later she built a big open fireplace in one of the drawing-rooms. There is an inscription in the mantelpiece reading: "East or West—Home is Best," with the sign A. (Alexandra). At one time it was rumored that the castle would be acquired by King George, but owing to his ill-health, it is stated, the purchase was never accomplished.

Entertained Full House

The Duchess of Kent entertained a "full house" for dinner on a recent Sunday night. Guests were King George and Queen Mary, of England; King Haakon VII, and Queen Maud, of Norway, and King Christian X, of Denmark.

It's a fine thing to be a gentleman, but it's an awful handicap in an argument.

Japan: "The honourable gentlemen are very kind, but I like to be by myself on these occasions!"—News of the World.

Little Helps For This Week

They that trust in the Lord shall be as Mount Zion which cannot be removed, but abideth forever. As the mountains are round about Jerusalem, so the Lord is round about his people from henceforth even for ever. Psalm 125:1-2.

How on a rock they stand,
Who watch His eye and hold His
guiding hand;
Not half so fixed among her vassal hills
Rises the holy pile that Kedron's
valley fills.

That is the way to be immovable in the midst of troubles, as—a rock amidst the waves. When God is in the midst of a kingdom or city He makes it firm as Mount Zion, which cannot be removed. When He is in the midst of a soul, though calamities throng about it on all hands and roar like the billows of the sea, yet there is a constant calm within, such a peace as the world cannot give nor take away. What is it but not lodging God in the soul but keeping the world in His stead, that makes men shake like leaves at every blast of danger?

France Has New Sport

Shooting Fish On Ocean Bed Has Become Craze

Saint Raphael, France, reports that a fish-shooting season has opened on the bed of the ocean for the first time, and the sport is becoming a craze. It is due to the invention of an underwater hunting outfit by Colonel le Prieur. Each hunter wears a rubber mask containing a glass porthole. This is connected with a bottle of compressed air, strapped to the shoulders, which makes breathing under water normal. A pneumatic gun completes the equipment. "Bags" of edible and interesting specimens have been reported by hunters.

Liner "Queen Mary"

Scale Model Of Ship Is Insured For \$30,000

A scale model of the liner "Queen Mary," so valuable that it is insured for \$30,000, has been brought to New York from England and placed on display in the Cunard White Star line's offices.

The model, weighing just under a ton, is 21 feet long, has a beam of 2½ feet and its mainmast stands four feet 10 inches.

It took 25 workmen in Northampton, England, three months to build the ship.

At the Movies.

Randolph Scott, tall, handsome Paramount adventure star, plays the leading role in the filmization of Zane Grey's "Wagon Wheels," the dramatic account of the adventures of the first wagon train to cross the country to Oregon in 1844, which comes to the Opera House this Saturday.

With Gail Patrick, Monte Blue and Raymond Hatton in the chief supporting roles, the film also presents the newest discovery among child actors, little 4 year-old Billy Lee, who plays an important role as Gail Patrick's son.

"Wagon Wheels" was adapted from Zane Grey's "Fighting Caravans" and depicts the hardships, perils and romantic lives of the sturdy, adventuring pioneers who helped to forge an empire by their conquest of the West.

Next Wednesday and Thursday, "Freckles," Gene Stratton Porter's stirring tale of the Limberlost will be the attraction, with Tom Brown as "Freckles" and Virginia Weidler as Laurie Lou.

This picture is full of living heart thrills which made it the biggest selling romantic story of all time. The beautiful settings where the picture was filmed help to make it one of the great pictures of the year.

Evangelical Church Notes

Captain Bishop, of the Innisfail Corps, Salvation Army, will be the guest-preacher next Sunday morning. As Capt. Bishop is to be transferred soon, and this will perhaps be his last visit to Didsbury, there should be a large and representative audience. There will be no evening service in the church, as we are uniting with the M.B.C. Church. All our people are urged to come out Sunday night and attend Rev. Edwardson's closing service.

The observance of Pioneer Day, which was to have been held this Sunday, will be postponed one week.

LOCAL & GENERAL

Rev Earle Archer left this week for Galahad where he will hold evangelistic services.

Two pair of ladies gloves were found in the opera house after the dance on Friday. Owners can get same by applying to Mr A Brusso.

The Evangelistic Services at the M.B.C. Church have been well attended. The meetings will continue till Sunday 19th.

Archie Boyce is planning to hold a Community Auction Sale the latter part of February. If you have anything to sell make your listings with C E Reiber.

Art Brewster left on Monday for Vancouver where he will join his uncle. Art has been working around this district for the past five years.

A. Melville Anderson, optometrist and sight specialist will make his regular visit to the Rosebud Hotel on Monday, January 20 1936. Eyes examined and glasses fitted (31c)

St Cyprian's W.A. will hold a whist drive at the home of Mrs Pitt next Wednesday evening. The proceeds will be used for a charitable purpose.

Rev. H. Edwardson of Hope Mission, Edmonton, will speak at Mountain View Community Hall on Sunday, January 19th, at 11 a.m. Come and hear his message.

We're Giving a 20 per cent Cash Discount on All Lines of Over-shoos — T. E. Scott

Mr. and Mrs. Fred Reiffenstein are receiving congratulations on the arrival of baby daughter January 1st. Little Loretta Vera has the distinction of being the first baby born in Didsbury in the new year.

To Clear! All Lines of Men's and Boys' Moccasins at Cost — T. E. Scott!

Mrs W. S. Durrer entertained a number of friends to bridge on Monday evening. Two tables were played and the honors went to Mrs Evans. After the games a delightful luncheon was served by the hostess.

The "Y" girls will hold their monthly meeting at the home of Mrs Wriggleworth on MONDAY, January 20th, at 8 p.m. Mrs C J Hallman will give the topic "Scientific Temperance". All girls are cordially invited to attend.

Mr and Mrs Sanderson were called home from a bridge party on January 10th saying that a friend from Saskatchewan was there. They were greatly surprised on arriving home as many friends awaited them. They all had a good time celebrating this date.

To Clear! Men's \$2.25 Felt Shoes for only \$1.75 — T. E. Scott

The W.C.T.U. observed the annual World's Day of Prayer at the home of Mrs. Burkholder on Thursday last with a goodly number in attendance with Miss Z Cressman in charge. Special musical numbers were rendered by the Misses Jackson, Bingeman and Neilson, of the Bible School, and were much enjoyed by all.

Reserve the evening of Tuesday, January 21st, commencing at 8 p.m. for the 4-Act Play "The Pill Bottle" presented by the players from the Olds United Church and sponsored by the C.G.I.T. groups of Didsbury. This play was presented to a capacity house at Olds and received hearty commendation. There will also be a musical prelude. Tickets will be sold by C.G.I.T. girls. Adults 25c, High School Students 15c, Children 10c. Come and see this worthwhile play at the United Church! (31c)
